Case record publications

Downloadable from www.yassermetwally.com

<http://neurology.yassermetwally.com/case.zip>

A. Case record publication (case.exe)

1-A downloadable software featuring a full radiological study of one case with a radiological report and review of literature. You can email the author from within the software. The software is a freeware, a gift not to sold.

2-You can easily browse through the whole of the case radiology, with a view simulating X ray films, Click on any thumbnail in the left panel and you get it magnified in the right panel viewer. A very powerful way of inspecting a radiological study.

[Case record of the week](#)

3-You can use the publication for teaching purposes.

4-The publication is free of charge (freeware) that can be freely downloaded, used and distributed free of charge.

5-The publication can be used on any computer running Windows XP or Vista without the need for any thing preinstalled in the system.

6-The publication is updated every month, that is to say a new case record is placed in my web site every month ready to be downloaded and used free of charge.

7-The publication is small (less than 3 MB for rapid download), yet very powerful and very useful.

8-It is mainly directed to neurologists, neuroradiologists and neurosurgeons.
